Sousa Archives and Center for American Music (John Philip Sousa), Harding Band Building

Use of Images

Need an image to post to social media (e.g., Facebook, Pinterest)? You can post low-resolution images from the Holdings Database/Photo Archives (http://archives.library.illinois.edu/archon/index.php) without getting permission. Most images should already have a University Archives watermark. While linking back to archives.library.illinois.edu is preferable, the Archives realizes sometimes this is not always possible. In the absence of a watermark, please be sure to link back to the Archives.

Archives Watermark

For Archives images you would like to use in print, you will need to get permission. This is essentially done by requesting a high-resolution image through the Archives website. Reproductions of all images from the Archives should contain a credit line of "Courtesy University of Illinois Archives" followed by the series/collection name.

Fee Structure

UI units pay a discounted fee (see Fee Schedule attached) for images from the Archive's online database that have already been scanned. These fees are in the *Each Additional* column of the schedule.

UI units pay a less discounted fee for images that have not been scanned already. These fees are located in the *First Image* column of the schedule. If the unit requests multiple images that need to be scanned, the unit pays the higher fee for the first image (*First Image*); each additional image is about half the cost of the first image (*Each Additional*).

Keep in mind, if you only need a low res image (perfect for the Web), you may want to consider viewing photos and other materials in person at the Archives and taking a photo with a smart phone or digital camera (without flash, of course). The Archives does allow this and there are no costs involved.

Also, 72dpi is most often suitable for the Web, 300 dpi is recommended for print (small to medium photos), and 600 dpi is recommended for print as well (large photos).

Charles Getz and the Instant Cream Whip Machine | University of Illinois Archives

Title: Charles Getz and the Instant Cream Whip Machine
Date: ca. 1932-35
Description:

Charles A. Getz (Goetz) (B.S., M.S., Ph.D., 1932, 1934, 1938), graduate student in chemistry, uses the instant cream whip machine, which he developed during his time at the University. He found that milk infused with pressurized carbon dioxide began to foam. He experimented with this principle on cream and began using nitrous oxide because it did not alter the taste of the product like carbon dioxide. This led to the development of artificial whipped cream. His patented method was used by Prof. G. Frederick Smith to create Instantwhip Foods.

Found in RS: 39/2/20, Box FAC - 4, Folder FAC - 4 GE

Click here to request a high-res image and refer to Fee Structure. Best for use in print.

Click here for a low-res image to use without permission. Best for use on the Web.

Searching

Enter your search term in the Search Holdings box on the Archives homepage to find images. The search is very literal, so to find an exact search word or term, put quotes around it.

There is a LibGuide with a quick reference on how to prepare to use the Archives. It includes basic and advanced tips on searching the database. This LibGuide is located at http://uiuc.libguides.com/archives.

Contact Information

You can reach Archives staff at 333-0798.

You can e-mail the Archives at illiarch@illinois.edu. Or, Chris Prom, Assistant University Archivist, at prom@illinois.edu is very responsive. And Bill Maher (w-maher@illinois.edu), University Archivist, knows everything there is to know!
