Stress as a Precursor to Burnout – Why One Size Does Not Fit All - The UIH NICU Experience - Dr. Aarti Raghavan

BREAKOUT SESSION B -3:45pm

SESSION 1:
Power of Writing – Dr. David Thoele

SESSION 2:
Peer Support: Mitigating the Emotional Stressors Faced by Healthcare Providers - Dr. Jo Shapiro

3:45 pm WRAP-UP

Burnout and stress have been known to contribute towards patient safety issues in healthcare. Understanding of workplace burnout and stress among various providers will aid in developing a more specific and targeted approach to stress reduction and burnout, thereby potentially reducing errors and improving safety for patients. This event targets physicians, fellows, nurses, social workers, nurse midwives and lactation specialists working in the NICU.

OBJECTIVES:
- Identify the link between stress, burnout and patient safety in healthcare, particularly in the NICU
- Differentiate between workplace stress and burnout
- Distinguish that factors contributing to workplace stress may vary according to provider role in a healthcare environment
- Apply various techniques to mitigate workplace stress and burnout

The University of Illinois College of Medicine at Chicago is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

University of Illinois Hospital and Health Sciences System is approved as a provider of continuing nursing education by Ohio Nurses Association, an accredited approver by the American Nurses Credentialing Center’s Commission on Accreditation. (OBN-001-91)
