PROJECT PROPOSAL

Project Proposal for Honors OR Research Project with Faculty

Describe your instructor-approved Honors project below. This description should explain the details of your project including: the topic being studied, imagined steps to complete your project, the length of the paper (if applicable) or what your finished project will be, what you hope to learn through your research, any theories you currently have as to what you will find, etc. We should be able to clearly understand the purpose and procedures for your Honors or research project. At minimum, your description should be a paragraph in length. Add an additional page if needed. If your instructor has provided you with a written project description, attach that document to this one before submitting for approval, instead of writing your own proposal. Proposals that are deemed to be incomplete or that do not clearly outline the nature of your project will be returned for further information.
